

Yogeeshwar Uppula

Software Developer - Backend

📞 6301522395 ✉ yogeeshwar.uppula@accenture.com 🔗 [Yogeeshwar Uppula | LinkedIn](#) 🔗 [Yogeeshwar9 | GitHub](#)

SUMMARY

Software Developer with hands-on experience in Java, Spring Boot, and Microsoft Azure. Currently working at Accenture since September 2024. Experienced in developing backend services, REST APIs, and cloud-based applications using modern Java technologies. Possess working knowledge of Azure services including Azure Functions, Storage Accounts, and Azure Table Storage, with experience understanding and supporting cloud-based integrations and workflows in enterprise applications. Strong understanding of object-oriented programming, databases, and full-stack web development using React.js and related technologies.

EXPERIENCE

Java Developer

Accenture

📅 09/2024 - Present

- Developed and maintained enterprise applications using Java, Spring Boot, and Microsoft Azure.
- Worked with Azure Functions to implement serverless business logic and event-driven processing.
- Managed data storage solutions using Azure Storage Accounts and Azure Table Storage.
- Designed and consumed REST APIs for seamless communication between distributed applications.
- Investigated and resolved production issues, improving application stability and performance.
- Collaborated with cross-functional teams in an Agile environment and participated in code reviews, testing, deployment, and support activities.

EDUCATION

B.Tech in Information Technology

Vardhaman College of Engineering (VCEH)

📅 12/2020 - 04/2024 📍 Hyderābād, India

GPA
7.99 / 10.0

SKILLS

Java SE/EE	Spring Framework	Spring Boot	RESTful web services	Azure Functions				
Azure Storage Accounts	Azure Table Storage	React Js	Java Script	HTML	CSS	Node Js		
MySQL	PostgreSQL	Git						

CERTIFICATIONS

Introduction to Front-End Development – Meta

PERSONAL PROJECTS

Insurance Policy Management System with Authentication

[GitHub - Yogeeshwar9/PolicyExplorer at Main](#)

- Developed a robust Node.js and MySQL-based project for CRUD operations with authentication
- Implemented functionalities for creating, reading, updating, and deleting records in a policy database
- Managed policy details such as policy number, insured party, coverage type, dates, premium amount, and status

Technologies: Node.js, Express.js, MySQL, JavaScript, HTML, CSS, Bootstrap, JWT Authentication, REST APIs

Doctor Appointment Booking System with React.js

[GitHub - Yogeeshwar9/Appointment_Booking_using_React at Main](#)

- Designed and implemented an intuitive React-based appointment booking system.
- Enabled users to add, edit, and delete appointments through a user-friendly form and dynamic appointment list.
- Leveraged React-controlled components for efficient data management and real-time updates.

Technologies: React.js, JavaScript, HTML, CSS, Bootstrap, JWT Authentication, REST APIs
